

## SEMANA DE IDEAS REVOLUCIONARIAS PARA PROYECTOS DE TECNOLOGÍAS FUTURAS Y EMERGENTES

**Desde** 2020-10-26 **hasta** 2020-10-29, Bruselas, BE

***El proyecto PREFET, financiado con fondos europeos, organizará una IdeAcademy Week entre el 26 y el 29 de octubre de 2020.***

La IdeAcademy Week es un curso de cuatro días sobre las principales tendencias tecnológicas en I+D y aquellas con un mayor impacto social. Durante el curso, se presentará contenido exclusivo para ayudar a los investigadores que deseen participar en proyectos revolucionarios con el objetivo de crear un futuro mejor. Se abarcarán diferentes disciplinas, como la computación, la biología, la ciencia ambiental, la biotecnología, el estudio avanzado de los materiales y la detección, las matemáticas, la impresión 3D, las humanidades y las ciencias sociales.

La iniciativa también está abierta a empresas y pymes en el campo de la alta tecnología, personas con ganas de generar ideas y participar en actividades prospectivas y creativas, responsables políticos, puntos de contacto nacionales, miembros del Consejo Europeo de Innovación, representantes FET/Pathfinder y participantes en programas ERA-NET.

## The HERoS project organises a webinar to present initial findings and policy recommendations

From 2020-10-27 to 2020-10-27, Brussels, BE

***The HERoS project - which aims to improve the effectiveness and efficiency of the response to the COVID-19 outbreak - completed its Rapid Response Phase in September 2020. To share the results of this initial period, the consortium organises a webinar, free and open to all, on Tuesday, October 27th.***

**Registration:** <https://www.eventbrite.com/e/heros-rapid-response-phase-results-tickets-125929605841>

**Details:** <https://www.heros-project.eu/webinar-results-from-the-rapid-reponse-phase/>

The webinar will present results from the following deliverables:

D1.1 Recommendations for governance and policies in the COVID-19 response

This report utilises social scientific methods, particularly (policy) document analysis, discourse analysis and interviews, to unravel the social and human aspects of decision-making practices, collective sensemaking and co-ordination. The guiding questions are: “How did various formal and informal stakeholders govern the COVID-19 crisis situation over time? How did they collectively make sense of the evolving situation and make joint decisions? How did the involved agencies collaborate and co-ordinate their activities in

response to the COVID-19 crisis?”

D2.1 Local behavioural model and recommendations for local COVID-19 response

This deliverable makes a head start on agent-based modelling that provides insights into the dynamics of the spread and the impact of different policies in two cities. Based on this, we provide recommendations for cities and governmental bodies on robust policies that help to control the spread of the disease.

D2.2 Public health system analysis and recommendations

This study assesses how healthcare systems responded to the crises during the first wave of the COVID-19 pandemic in the spring of 2020. In the study we analyse how different health care system features, country characteristics, and COVID-19 non-pharmaceutical interventions affected the spread of the virus on healthcare systems in Europe in the spring of 2020 and how the health care systems responded. There are five different focus areas in this deliverable: 1) statistical model for the advance of COVID-19, 2) preparedness assessment, 3) analysis of testing, 4) analysis of hospital intensive care units, and 5) analysis of the behaviour of healthcare professionals.

D3.1 Gap analysis and recommendations for securing medical supplies for the COVID-19 response

By analysing primary data (interviews) and secondary data (reports) of the end-users of HERoS and of other members of

medical supply chains, we have identified disruptions and their associated gaps caused by consumer behaviour, capacity limitations and legislation. In particular, gaps in the production, logistics and cargo transport, fulfilment and delivery of medical supplies orders to health professional and patients were identified. In addition, gaps for preventing fraud and competition between suppliers as well as gaps in vetting processes of new partners were noted. Gaps related to quality standards and certificates, as well as imports and exports regulations contributed to delays of delivering life-saving items.

#### D4.1 Assessment of the online spread of coronavirus misinformation

In this deliverable, we present the state of the art in measuring the impact of fact-checking, highlighting a gap in which our knowledge of misinformation spread patterns is disconnected from how we approach the diffusion of fact-checking information. We show how current approaches that use holistic or aggregate measures may not provide the level of granularity needed to budge persistent claims. We outline some of the important features of the current COVID-19 pandemic, such as the companion “infodemic”, values and culture, that make measuring impact even more difficult. We highlight the necessity for understanding the “co-spread” of both misinformation and fact-checking information, to be able to measure the impact of fact-checking on specific misinforming claims temporally and, potentially, at the geographic or platform level.

#### About HERoS

The overall objective of HERoS is to improve the effectiveness and efficiency of the response to the Covid-19 outbreak by: providing policies and guidelines for improved crisis governance; modelling the impact of local behaviour; improving the management of medical supply chains; analysing the spread of online misinformation.

## Online Workshop: Materials & Processes for Thermal Solar Systems

From 2020-10-27 to 2020-10-27, Barcelona, ES

***This workshop will provide an overview of the current technological developments in the field of materials and processes for thermal solar systems. Speakers from major European research institutes and companies will present recent disclosures and their applications in the production of renewable energy through concentrated solar power, photovoltaic, solar heating and cooling, and more.***

This workshop will provide an overview of the current technological developments in the field of materials and processes for thermal solar systems. Speakers from major European research institutes and companies will present recent disclosures and their applications in the production of renewable energy through concentrated solar power, photovoltaic, solar heating and cooling, and more. In particular, results from 5 large European research projects in the field of concentrated solar power will be presented and outlooks for the future of the industry discussed. Participants will be invited to discuss with each other to foster new business opportunities.

Speakers at the workshop are coming from the following organisations: CEA, Fertiberia, Tekniker, ENEA, CNRS, TSK, DLR, CENER and Leitat.

Participation to this event is free but registration is required. If you are interested in attending, go to <https://in-power-project.eu/online-dissemination-event-materials-processes-for-thermal-solar-systems/>

The IN-POWER project is a European project that aims at developing highly efficient concentrated solar power architectures such as innovative material solutions to increase the efficiency while simultaneously decreasing the energy production cost. Concretely, the project develops glass free mirrors, lighter mirror structures using composite materials, new absorber materials to convert light into heat as well as better energy storage materials allowing electricity dispatch for 24 hours. The project will validate these novel functional materials and new manufacturing processes will guarantee decreases in levelized costs of electricity below 0.10€ kWh beyond 2020.

## Introduction to Horizon Europe (Part II. of the European Funding Academy)

From 2020-10-27 to 2020-10-27, Online, HU

### 1-day online course on 27 October 2020

We will mainly discuss 3 HOWs:

- How will the structure change?
- How will the proposal development be affected?
- How differently will we manage our Horizon Europe projects?

Presentations will be interactive, the participants will have to reply to questions, answer in online games and polls, which will allow the participants to understand the new programme in a fun and engaging way.

The afternoon will be dedicated to testing your knowledge. The e-learning portal will give the possibility to learn more on Horizon Europe through different games, quizzes and online exercises. The trainers will be available in live Q&A sessions in the afternoon.

Topics covered:

-Introduction to Horizon Europe

\*Structure

\*New funding schemes

\*Practical perspective on 3Os, SDGs, Clusters, Missions, Partnerships, InvestEU etc.

-Changes in Horizon Europe compared to H2020

\*Proposal writing

\*Evaluation

\*Financial reporting

\*Dissemination reporting

\*Audits

\*Impact monitoring

## Managing efficiently an R&I project (Part III. of the European Funding Academy)

From 2020-10-28 to 2020-10-29, Online, HU

***This live online course is part of our European Funding Academy discussing the processes and tools that should be in place to ease your project management journey while preparing your periodic technical and financial report for the EC.***

Online course on 28-29 October 2020

This project management course will provide you with practical tips and tools for setting up your project management and communication system. We will guide you through the preparation of the Consortium Agreement, introduce the effective dissemination and communication strategies, and most importantly help you to tackle periodic reporting and technical reviews. We will also provide an outlook to the upcoming research and innovation programme Horizon Europe from a management perspective.

Presentations will be interactive, the participants will have to reply to questions, answer in online games and polls, which will allow the participants to understand the key processes and steps in project management in a fun and engaging way.

The afternoons will be dedicated to practicing. The e-learning portal will give the possibility to the participants to test their knowledge, practice the skills in different games, quizzes and online exercises. The trainers will be available in live Q&A sessions in the afternoon.

## Face-to-face seminar on developing successful grant applications in Horizon Europe (HEU-Open) before anyone else

From 2020-10-29 to 2020-10-30, Santorini, EL

***A crash course on how to create winning Horizon Europe grant applications before anyone else. (There is a way).***

### Learning Objectives

- ✓ To think and act like a leader in Horizon Europe
- ✓ To recognize which proposals will fail and which ones will succeed in Horizon Europe
- ✓ To identify the most promising Horizon Europe call topic according to your resources, experience and determination
- ✓ To understand the full proposal development cycle
- ✓ To develop great ideas for your Horizon Europe proposal
- ✓ To connect with key actors in Horizon Europe
- ✓ To receive easily and quickly critical feedback on your Horizon Europe proposal

- ✓ To attract competent partners for your Horizon Europe project
- ✓ How to identify highly competent Horizon Europe proposal initiatives and get involved as partner
- ✓ To impress the evaluators with your grant application form
- ✓ Realise why you should be more optimistic in Horizon Europe than in Horizon 2020
- ✓ Understand why it is important to start preparing now for Horizon Europe
- ✓ Prepare a strategy with detailed actions for your organisation, group or clients for exploiting successfully Horizon Europe and
- ✓ Prepare for the key success criteria in Horizon Europe

## Curso Biobridges

Desde 2020-11-02 hasta 2020-11-02, Ámsterdam, NL

***El proyecto BIOBRIDGES, financiado con fondos europeos, organizará un curso el 2 de noviembre de 2020.***

Celebrado como parte de los World Bio Markets 2020 y en el mismo lugar que los SynBio Markets 2020, BIOBRIDGES impartirá un curso dividido en cinco partes el día dedicado al seminario antes del congreso (3 y 4 de noviembre). En la parte núm. 1, los oradores realizarán una introducción y describirán los objetivos del seminario. La parte núm. 2 abordará ideas sobre los principales impulsores y obstáculos para las industrias, los consumidores y las marcas en el proceso de transición hacia los bioproductos, así como los ámbitos de aplicación maduros o más prometedores. La parte núm. 3 se centrará en el tema «de la industria al mercado». En la última sesión, el curso finalizará el día con la parte núm. 4 sobre el tema «del mercado a los consumidores» y la parte núm. 5, consistente en una conclusión y una descripción de las etapas siguientes.
