What are the EELISA communities European University

Diverse and ever-expanding nodes where education, research, professional experience, and societal challenges merge.

The EELISA communities are mission-driven working groups that bring together students, teachers, and researchers from all partner universities with prestigious professionals, grassroots organizations, citizens, private companies, and public institutions to find innovative solutions to real-world challenges.

Each community will define its main elements: mission, challenges, people/organization, activities, and evaluation criteria.

THINK TANK ESA-ESAC - SUSTAINABLE BCC : SUSTAINABLE BUILDINGS

Our community SUSTAINABLE BCC

SUSTAINABLE BCC. TECHNICAL AND SOCIAL CHALLENGES FOR SUSTAINABLE BUILDINGS, CITIES AND COMMUNITIES

Foster a European university ecosystem to leverage synergies, to innovate and educate by stimulating technical and social challenges for more efficient and sustainable buildings, cities and communities.

Welcome to the environment in which We all will be operating in the coming years : SUSTAINABLE & DIGITAL BUILDINGS.

Enjoy!!

THINK TANK ESA–ESAC - SUSTAINABLE BCC : SUSTAINABLE BUILDINGS

The Activity:

The ESA-ESAC - SUSTAINABLE BCC think tank is an educational activity to promote innovation and generate fresh ideas to launch a comprehensive sustainable refurbishment of the European Space Agency (ESA) building “A” in Spain. Together with ESA-ESAC (partner of SUSBCC) we will organise a high impact activity consisting of a large think tank, with the participating students and the support of professors, researchers, and professionals, to undertake a comprehensive rehabilitation operation in the spirit of the New European Bauhaus and with the triple bottom line approach of sustainability (social, economic, and environmental).

This activity is a very good opportunity for students who participate both in person and virtually, to acquire a global and integrative vision from the spirit of the New European Bauhaus and sustainability, gaining awareness and commitment to social, economic, energy, and environmental concerns, as well as discovering the potential offered by current digital trends to support and promote them from a perspective of efficiency.

This activity will take place in a creative and collaborative international environment with the participation of an estimated 300 international students and more than 100 international professors, researchers and professionals.

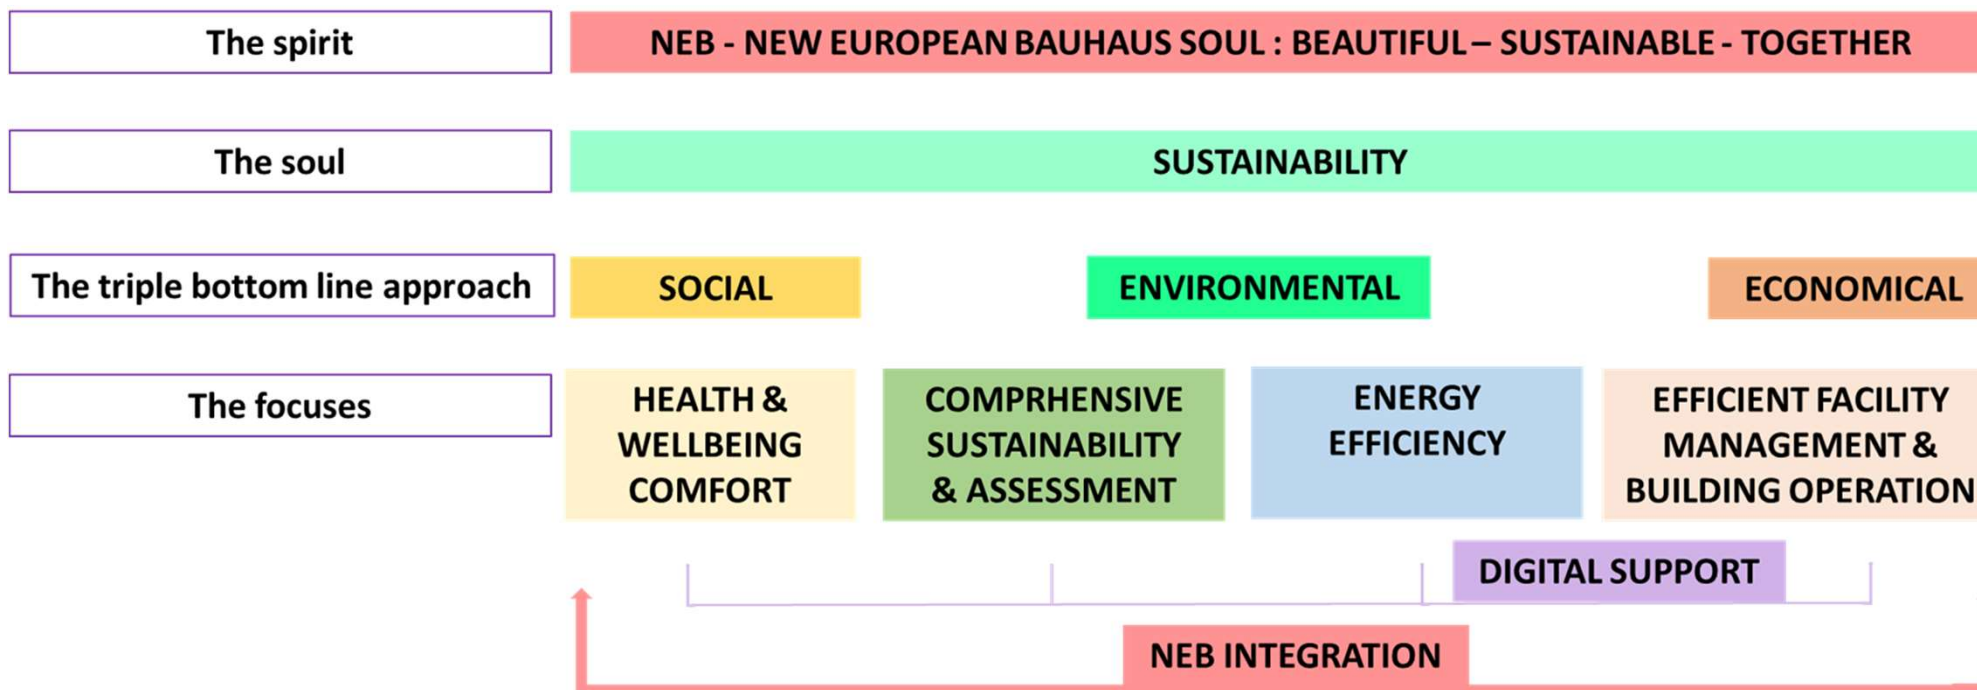

[https://www.esa.int/About Us/ESAC](https://www.esa.int/About_Us/ESAC)

The Think Tank:

The development of this ESA-ESAC-SUBCC think tank will take place in a hybrid format in the last week of January 2023 (23-27 January) at the ESA-ESAC headquarters in Villanueva de la Cañada, with the participation of around 300 international students (50 on-site). The scope of development will cover the entire academic year 2022-2023, with activities in both the first and second semester.

The think tank is actually composed of **6 different think tanks: 4 working in thematical parallel sessions** from the three pillars of sustainability, **1 cross-cutting** think tank on digitalisation, and **1 collective think tank on integration** through the New European Bauhaus Spirit.

The Workshops:

Each of the parallel think tanks consists of **8 thematic workshops of 2h each** in which the different **collaborative working groups** (4 to 8 per parallel think tank) will be proposed **specific challenges** to discuss and generate ideas, analysing and trying to reach common conclusions. In addition to this, there will be four workshops for analysis, recapitulation, and integration of conclusions and lessons learned.

Prior to the development of the activity, students, professors, researchers, and professionals will have access to a repository of teaching and informative material on each of the topics under analysis, in the form of a flipped classroom.

Every thematic workshops of each of the think tanks will be organised with 30 minutes of a master class to unify criteria, resolve doubts and define the specific challenges proposed to each working group. These challenges will be the object of collaborative work and reflection for 1 h (mixed face-to-face-virtual groups) and an additional half hour of sharing the findings and conclusions consolidated in the workshop.

The integration workshops are to share the partial and final conclusions of each of the think tanks in the different thematic workshops.

THINK TANK ESA—ESAC - SUSTAINABLE BCC : SUSTAINABLE BUILDINGS

What We need from professors and researchers:

Action for global awareness and commitment

Take a few hours to participate in some of the workshops, join the action and help build awareness and commitment for the next generation of professionals to the need to foster more efficient and sustainable buildings, cities and communities.

Your experience as a role model for students:

Supporting to enrich the education of students by contributing your knowledge, experience and your example of how to generate ideas, analyse them and defend them, teaching by your example how to think. The main objective is the joint work of professionals and committed students for mutual enrichment.

Participate in as many workshops as you want:

Sign up and participate in the workshops you are more interested in, or where you think you can contribute the more. Share your ideas with the students. Stimulate and encourage their creativity. Show them how to think. Teach them how to interrelate knowledge and how a global, interdisciplinary and integrated vision can generate inspiring ideas.

Every workshop is two hours long of virtual participation (Teams) with stimulating topics and challenges.

THINK TANK ESA—ESAC - SUSTAINABLE BCC : **SUSTAINABLE BUILDINGS**

What participating professors and researchers gain:

Fresh ideas from action:

Join in the activity and together we will generate fresh ideas to solve today's challenges by harnessing the dynamism and creativity of the students, with the expertise and professionalism of our specialists. Welcome to the action!!

Knowledge and information:

Participants will work in a fully international event conducted in English. Students, professors, researchers, and professionals will receive an extensive background information with knowledge on all topics related to social, economic, energy, and environmental sustainability, digital tools, and integration according to the New European Bauhaus for more efficient and sustainable buildings and cities.

Multidisciplinary and comprehensive enrichment:

Participants will enrich their experience from a global and comprehensive vision with an interdisciplinary perspective by the participation of students, professors, researchers, and professionals from many different disciplines (architects, engineers, economists, sociologists, facility managers, psychologists,).

Acknowledgements:

Participants will receive a certificate from the community coordinator informing of their active participation in the event and in the workshops attended.

Professors and researchers are welcome to become member of the EELISA community SUSTAINABLE BUILDINGS CITIES AND COMMUNITIES. Once you are officially part of the community (update once a year in January), you will receive a certificate as member of the community.

Activities linked to the EELISA Communities are considered as educational innovation, and useful merits for our curriculum vitae.

THINK TANK ESA-ESAC - SUSTAINABLE BCC : SUSTAINABLE BUILDINGS

23rd to 27th January 2023

Hybrid format International Think Tank:

50 International students face to face on ESA Campus - Madrid

200-300 international students virtual:

.- Full think tank

.- In the workshops you are more interested in

More than 100 international professors & professionals

Challenge based learning from a multidisciplinary approach

Mixed teams: students, professors, researchers, professionals

4 parallel, 1 cross-cutting, 1 NEB integration Think Tanks

30 thematic workshops with its focus challenges

New European Bauhaus: SUSTAINABLE, BEAUTIFUL, TOGETHER
