

Whitewater Group S.L. is a leading water treatment solutions company operating throughout Europe. We are currently in the process of expansion. We are looking for a Process Engineer to work on various projects in the healthcare, industrial, municipal, pharmaceutical and data center sectors.

Essential duties and responsibilities include, but are not limited to, the following:

- Organize and supervise the work of Foremen and journeymen (in-house and subcontract).
- Ensuring that deadlines are met.
- Economic and financial control of your work
- To make comparisons of materials and subcontractors
- Preventive resource of work.
- Ensure compliance standards in PRL and quality.

Qualifications:

Our ideal candidate will be a positive, motivated and proactive person. Must be able to work independently and as part of a team. Great opportunity for personal and professional development within the company in the medium to long term. Additional qualifications required include:

- Minimum educational background Higher Vocational Training in mechanical installations or electricity.
- Experience not required, although profiles with at least 1 year of experience are also valued.
- Leadership and organizational skills
- Availability to travel throughout Europe.
- Good level of English is essential.
- Knowledge of site measurements and planning.
- Very valuable to have knowledge in: AutoCad and Office Package.
- Training in Occupational Risk Prevention.

This is a long term stable position to stay in the Company Office, located in Getafe (Madrid) with short time travel at site. Once this project is completed, the candidate will travel to the assigned site of the next work, so it requires a profile with availability to travel throughout Europe.

Salary: to be agreed with the candidate
