

## MODEL OF TRAINEESHIP PROJECT

### TRAINEESHIP TITLE:

Allium Breeding Trial Harvest Support

### STUDENT WORK:

Field operations including scorings of agronomic and disease resistance traits.

Preparing field for harvest.

Uplifting Onions.

Loading Onions.

Labelling of harvested onions.

Transporting onions off the field and preparing them for shipment.

### REQUIREMENTS: *(COMPETENCES NEEDED FOR THE TRAINEESHIP, BSC DEGREE AND COURSE)*

You are currently enrolled in a BSc or MSc program in an agricultural or related field.

You are interested in plant breeding and practical work.

You should be aware that all the work will take place outdoors, not in the lab or office.

You are flexible and willing to work longer hours depending on weather conditions.

You should be able to communicate in English, German or Spanish (B1 level or higher).

### TRAINEESHIP PROJECT:

The objective of this internship is to support the R&D network harvesting onion breeding fields in **Germany and Austria**. The intern will assist with harvesting onion breeding trials in Bavaria and Austria, as well as sowing overwintering onions.

### ACTIVITIES TO DEVELOP DURING THE TRAINEESHIP:

The main job of the student will be controlling the onion lifter to avoid plot mixing and packing the onions in bags on the onion harvester. Other tasks would be labelling and loading the onion bags in boxes and labelling boxes.

Accommodation will be paid for by the company.

For this position there is a Bonus if the harvest period is completed
