

Luigi's initial PLE

## **IMPROVEMENT OF MY PERSONAL LEARNING ENVIRONMENT**

After comparing with the works of my classmates and receiving feedbacks from the teachers, my **Personal Learning Environment** diagram **improved** this way:

1. Getting inspired by my classmates, I added many **other resources and platforms** of which I forgot about.
2. Following the teacher's suggestion, I divided the resources into several more specific **categories**.
3. I included some **comments** when relevant. As an example, I mentioned the newsletters I subscribed to, the website for the online tools I use or simply a motivation on why I use that particular resource. The reason is that I believe this work is not only for us to understand what our PLE is composed of, but also to give suggestions of new tools or resources to the others.

I also wanted to place the boxes in order, trying to follow the steps of the "learning process", for example, first inspiration, then research, then creation and then sharing. However, I realized that this sorting system is too strict, as some categories don't come before or after others, but they are constantly present throughout the whole process.

Luigi's improved PLE

Spark: best e-mail provider I tried

Telegram: sharing of large dimension files

Google docs, sheets and slides: particularly efficient for simultaneous work

Canva: very useful for CV, free and with wide design choice

Online tools: image crop (imageonline.co), PDF compression (smallpdf.com), background removal (remove.bg), icon library (flaticon.com) -> the one I'm using for this slide!

Notability for sketches and picture editing

Mendeley: reference management tool, free and easy to use: strongly suggested!

Research Gate: provides overviews of many topics, gathering the most relevant publications

1TB Hard Disk as a backup!

### Communication

### Storage

### Inspiration / News

@HistoryCoolKids  
@InterestingEngineering  
@UnnecessaryInventions

Newsletters from:  
Ellen MacArthur Foundation,  
Wind Europe,  
Cambridge Institute of  
Manufacturing

whenever I can; I like to read on paper..

### Sharing

### Organization

Reminders, Notes, Calendar:  
Apple built-in apps

CamScanner:  
useful for scanning of  
paper documents

### Creation

### Info management

### Research

iPad note taking tools:  
GoodNotes & Notability  
are the best
