

PhD position available on **Dynamic fracture of fibre-reinforced concrete**

The **Solid Mechanics Group** led by Professor Gonzalo Ruiz in the **University of Castilla-La Mancha** is looking for hardworking and enthusiastic PhD candidates. The research is to be focused on the numerical modelling or/and experimental study of dynamic fracture in fibre-reinforced concrete.

Expectations

- Master in Civil, Mechanical Engineering, equivalent expertise or second-year master students
- Knowledge on and interest in programming languages (Matlab, C++, Fortran) are a plus
- Team work spirit
- Capacity to communicate in English (written and spoken)

Offer

A research contract for 20 months, possibly extendable to four years.

Timeline

To start in May, 2021 or until filled
